1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 7, line 2 "cylinder" first occurrence has been changed to --cylinders-- thus correcting a grammatical error.

In claim 10, line 1 "claim 1" has been changed to --claim 8-- thus providing antecedent basis for "said first and second ball and socket joints".

2. The following is an examiner's statement of reasons for allowance: the prior art references of record are not seen to teach the additional limitations of the valve having a threshold pressure of operation and means for allowing unrestricted flow inside the tubing and means to block the flow, each means related to the threshold pressure of operation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note particularly, the use of piston cylinders in French patent to Schegerin, Ousdal, European patent to Mozzati, Baker, McFarland, Robbins, Varteressian and Alsup.
